Onewrite Payroll System

Payeflow Onewrite is a paper based payroll system ideal for quick and accurate completion of payroll information

Kalamazoo Secure Solutions Limited has been providing innovative payroll solutions since 1945 when PAYE was first introduced in the UK. Our paper based Payeflow Onewrite system enables small to medium sized organisations to implement efficient and effective payroll processes.

The system provides the financial controller with the basic tools to manage costs across multiple cost centres, calculate holiday accruals and carry out monthly tax returns using a single solution and via single entry of information.

This famous paper based payroll system allows you to complete the individual pay record, company pay record and the pay slip in one writing action. The forms are designed in such a way that completing the records is logical and easy, ensuring that all legislative details are collected.

With a sturdy lockable carry case all pay records can be stored securely when the pay period is complete. On pay day the side of the case can be removed and acts as a peg board to collate the forms together allowing accurate completion of the pay records.

This information collected each pay day can be carried forward allowing easy completion of the end of year page on the Inland Revenue web site, thus allowing the government initiative of filing the end of year by internet to be met.

Kalamazoo are accredited by the Inland Revenue to supply payroll systems, therefore you can have peace of mind that you will continue to adhere to the latest payroll law and legislation.

The Payeflow™ Onewrite system can be purchased as a 'ready to use' kit consisting of:

- 25 individual payroll records
- 25 payroll sheets
- 250 pay advice forms
- 100 FREE pay envelopes
- 12 government remittance summaries
- Instruction booklet
- FREE Kalpak case with integral writing board and indexes
