

Secure Solutions

## Troy MICR 2055 printer

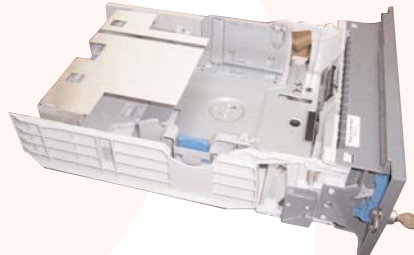

Faster printing and built in duplexing allow for multifunctional use in the small office environment

Cheqflow2 is fully compatible with the Troy MICR 2055 printer and combined they become a highly reliable and secure cheque printing solution. The Troy printer range offers a Magnetic Ink Character Recognition (MICR) facility. Troy printers are based on highly robust Hewlett Packard printers and use APACS approved MICR fonts.

Scalable and easily tailored to your business needs, Troy printers offer a cost effective, highly secure solution for in-house secure document production.

The Troy MICR 2055 is an ideal solution for any small office looking to improve their existing cheque printing processes. It offers printer resident MICR and security fonts in a factory-configured package.

The HP award-winning reliability combined with printer-optimised MICR security fonts, a choice of network connectivity, a new paper input accessory and duplex printing make this a trusted printing solution.

### Troy printer security features

- The numeric keypad for use in high security PIN authentication workflows
- The 3-position printer key locks and paper tray locks reduce the risk of cheque stock theft and printer misuse
- TROYmark™ is a watermark of userdefined variable data, printed diagonally across each cheque. It provides state-of-the-art deterrence against fraudulent cheque alteration
- The Auto-Protect Font feature prints the word "VOID" when a file is incorrectly routed to a non-MICR printer
- The exact positioning technology allows users to precisely adjust the MICR line without affecting the data file. This functionality will significantly reduce the number of rejected cheques due to misplacement
- Troy's encryption/decryption technology "unlocks" and prints the data only when it is received at the Troy printer
- Troy MICR toner cartridge ensures maximum reliability and low operating costs
