

Secure Solutions

Troy MICR 4015 printer

Highest level workgroup printing security

Cheqflow2 is fully compatible with the Troy MICR 4015 printer and combined they become a highly reliable and secure cheque printing solution. The Troy printer range offers a Magnetic Ink Character Recognition (MICR) facility. Troy printers are based on highly robust Hewlett Packard printers and use APACS approved MICR fonts.

Scalable and easily tailored to your business needs, Troy printers offer a cost effective, highly secure solution for in-house secure document production.

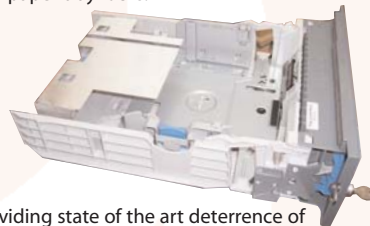

The Troy MICR 4015 Secure Ex printer offers the highest operational, document and communication security ideal for a wide range of secure workgroup MICR printing environments.

Replacing the 4250 series, the 4015 provides a more robust unit, with a new keypad for use in high security PIN authentication workflows.

It is designed to reduce the risk of cheque stock theft and printer misuse with its 3-position printer key lock and paper tray locks.

Providing state of the art deterrence of fraudulent cheque alteration, the TROYmark™ intelligent anti-tampering technology produces a user defined watermark, printed diagonally across each cheque.

The Auto-Protect Font feature prevents unauthorised printing to an alternative printer and prints "VOID" when files are incorrectly routed to a non-MICR printer.

Built-in MICR toner sensors and a toner-low response feature also help guarantee optimal quality.

The cheque processing performance exceeds ANSI, ABA and CBA standards.

Troy printer security features

- The numeric keypad for use in high security PIN authentication workflows
- The 3-position printer key locks and paper tray locks reduce the risk of cheque stock theft and printer misuse
- TROYmark™ is a watermark of userdefined variable data, printed diagonally across each cheque. It provides state-of-the-art deterrence against fraudulent cheque alteration
- The Auto-Protect Font feature prints the word "VOID" when a file is incorrectly routed to a non-MICR printer
- The exact positioning technology allows users to precisely adjust the MICR line without affecting the data file. This functionality will significantly reduce the number of rejected cheques due to misplacement
- Troy's encryption/decryption technology "unlocks" and prints the data only when it is received at the Troy printer
- Troy MICR toner cartridge ensures maximum reliability and low operating costs

Troy MICR 4015 key features

- Print speed - 52 pages per minute
- First page printed within 8 seconds
- Duty cycle - 225,000 prints per month
- Input capacity - 500-sheet built-in paper tray, 600-sheet multipurpose tray
- Input tray options - standard two trays (max six trays)
- Troy secure trays as standard
- Exclusive TROYmark™ intelligent anti-tampering technology

Models available in this series include:

Troy MICR 4015n Secure Ex Printer

- 1 x 500-sheet tray
- Lockable tray
- Dimensions - 22.4 x 21.1 x 19.7in.
- Weight - 59lbs
- Warranty - 1yr return

Troy MICR 4015tn Secure Ex Printer

- 2 x 500-sheet tray
- Lockable tray
- Dimensions - 31 x 23.6 x 21.3in.
- Weight - 74lbs
- Warranty - 1yr return
