

Visitor management

VisitorNet

The ultimate electronic visitor management system

VisitorNet is a highly sophisticated, yet easy to use visitor management solution, utilising the latest technology.

The comprehensive system enables your receptionist or employees to pre-book their visitors quickly and easily. The Windows based software can be used on your network or stand alone.

In addition, it's comprehensive database ensures that a record is kept of who is on site at all times, vital for the security of your organisation. The database allows reports to be run, detailing peak times, the number of hours contractors have been on site and instant fire lists - keeping you in complete control.

The facility to pre-print badges is ideal when a large number of visitors arrive simultaneously. To speed up the process, VisitorNet allows bar codes to be printed on each pass, so that visitors simply collect their badge and show it to a bar code reader which automatically logs them in and out.

VisitorNet can also accommodate a signature capturing facility. This ensures your visitors acknowledge your health and safety procedures whilst onsite.

VisitorNet makes it easy for the receptionist to inform the host that their visitor has arrived, with either e-mail or SMS text alert messaging.

Kalamazoo Secure Solutions Limited can also supply a wide range of identification accessories to complement your visitor management solution. Our ranges include, but are not limited to, customised lanyards, clips and wallets.

Secure solutions

Visitor management

Kalamazoo supplies a range of visitor management solutions to suit a diverse range of environments, budgets and requirements.

Manual passes

A secure and professional paper based solution for managing visitors.

Visitors complete their details onto a pass which simultaneously transfers all their details onto an integral register.

Full colour pass templates can be personalised to fit in with your brand and incorporate a range of additional security features, such as Timepass and CopyVoid.

VisitorNet

The front of house personnel can quickly and efficiently input visitor information and print fully customised visitor badges with this intuitive electronic system.

The solution builds a comprehensive database of visitor details and can run advanced reports such as instant fire lists, helping you meet stringent Health and Safety requirements.

The solution also has a range of optional modules including photo capture, electronic signature recognition and bar code reader.

VisitorNet MT

An enhanced version of the VisitorNet application, specifically designed for multi-tenanted buildings.

An electronic system which enables the main reception to quickly and efficiently input visitor information and print fully customisable visitor badges for multiple organisations. Numerous badge templates can be created and include a variety of corporate logos.

The solution builds a comprehensive database of visitor details and creates the ability to produce fully customisable reporting.

Card ID systems

Design and production of professional, full colour photo ID cards ideal for staff identification and access control.

Our solution enables organisations to produce high quality and durable ID cards quickly and easily. The layout of information is customisable according to specific requirements.

A range of additional security features can be applied including hologram, holodesign, guilloche backgrounds, invisible UV, magnetic and smart card encoding.

Accessories

Kalamazoo can also supply a wide range of identification accessories to complement your visitor management solution.

Our range of accessories include, but are not limited to, customised lanyards, clips and wallets. They are available in a variety of styles and colours to ensure they fit in with your corporate brand but also enable visitors, contractors and staff to be easily identified.
